CELEBRATE@THEVILLAGECHICAGO.ORG

Dr. Rao Kotamarthi – Chief Scientist & Department Head for Argonne National Laboratory’s Atmospheric Science and Climate Research Group – will talk about how innovations and President Biden’s plan should mitigate climate change and impact the future of work. He will discuss what jobs these initiatives might create and/or eliminate, how future jobs may change and what we as individuals can do to help.

ABOUT DR. RAO KOTAMARTHI

Dr. Kotamarthi has nearly 30 years of experience in climate research. He is Principal Investigator for projects ranging from climate modeling to wind energy for the Department of Energy’s Environmental Research Office. He led teams of climate scientists who analyzed the climate change impacts on Department of Defense installations and assessed the climate change vulnerabilities of lifeline infrastructure systems -- transportation, power, water/wastewater, and telecommunications. He authored the soon to be published book, *Downscaling Techniques for High-Resolution Climate Projections - From Global Change to Local Impacts*, published by Cambridge University Press, UK.

The Future of Work is an exciting intergenerational initiative presented by The Village Chicago that explores the rapid changes taking place in our world. Our goal is to enable all generations to understand these changes and the opportunities they present, so all generations can participate as the future is re-invented. The Village Chicago is a social network of friendship, engagement and services for people over 50. **Learn more by visiting thevillagechicago.org/.**
