

This document contains links to ArcGIS rest services contained in the COVID-19 Impacts Assessment products available [here](#). Every GIS Service published on an ArcGIS Server is considered a resource and can be accessed through a URL. This URL is also known as REST endpoint. Argonne National Laboratory is providing these REST services to those wishing to visualize the data on their own geographic information systems (GIS).

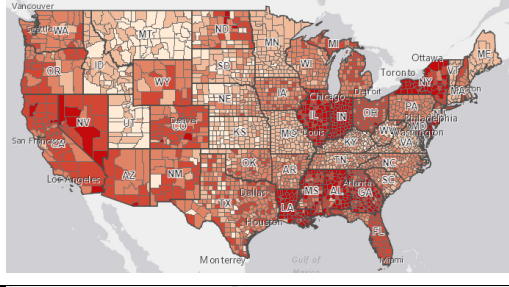

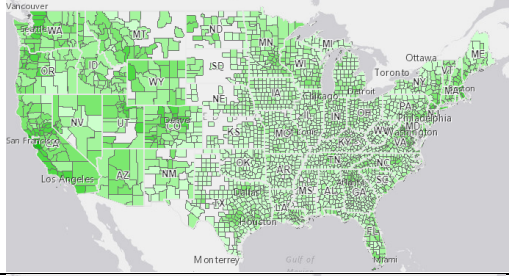

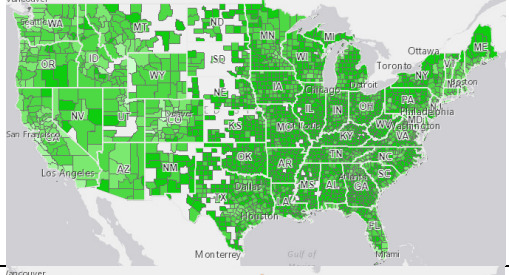

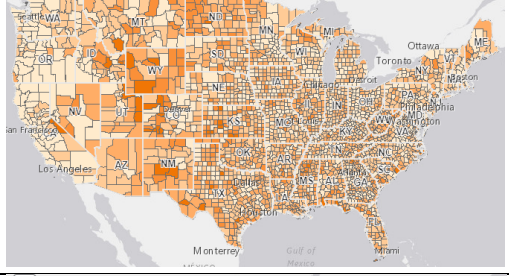

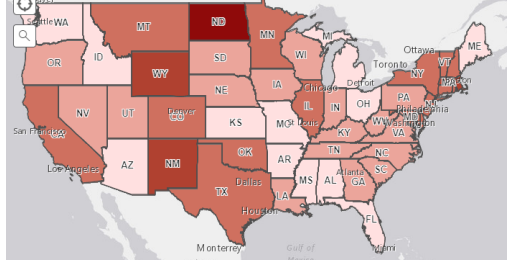

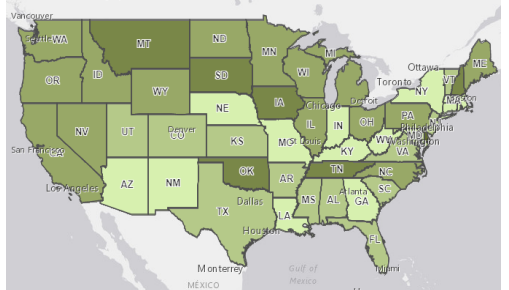

The following table describes the layer, provides an image of the service, and links directly to the rest service.
